Invitation for RFP Two Lane Flap/Swing Barriers

For the supply, installation, and commissioning of 2-lane flap barrier turnstiles at Gate No. 1 of Vasant Vihar Club, E-88 Paschimi Marg, Vasant Vihar, South West Delhi-110057, the following key specifications and tender requirements apply:

Technical Requirements for 2-Lane Setup

A typical 2-lane configuration requires three pedestals: two end units and one center unit with double flaps to create two separate corridors for access and exit.

Material & Build: Use of 304-grade stainless steel (minimum 1.2mm to 1.5mm thickness) is standard for durability. Flaps should be made of tempered glass or acrylic.

Access Control: Integration with RFID card readers (13.56 MHz frequency) and a microprocessor-based control panel for bi-directional control. Specification of the club card can be obtained from GM office. Interface with the club's ERP (CLUBMAN)

Performance:

- **Passing Speed:** Approximately 35–40 persons per minute per lane.
- **Lane Width:** Standard width of 1000mm for pedestrians.
- **Safety Features:** Must include infrared sensors for tailgating detection and an emergency fail-safe mode where flaps automatically retract during power failures or fire alarms.

Tender Submission Guidelines:

Offers should be submitted in a sealed cover and typically include the following sections as seen in standard procurement formats:

- **Technical Bid:** Documentation of the equipment's compliance with specifications, manufacturer's authorization, and company registration.
- **Financial Bid:** Comprehensive pricing including supply, installation, commissioning, and any applicable taxes.

Mandatory Documents: Proof of similar completed works, Certificate of Incorporation.

Site visit in coordination with General Manager on Monday 13, January 2026

Last Date of Submission on Monday 19, January 2026
